

SHE Rescue Lift-1K

Brand: SHE-Solution

Product Code: 100100100

Short Description

- approved for 2 persons
- Minimum load 50 kg
- Nominal load 200 kg
- Nominal lifting load 200 kg
- max. abseiling height 160 Meter
- automatic backstop
- direct drive
- fast lift function

Description

The SHE RescueLift is an ideal combination of a descender and a rescue device. This device, which is widely used in industrial applications, is the optimal device when it comes to safe abseiling or rescuing a helpless person.

The use of telescopic ratchets (here a telescopic ratchet and a fixed holding ratchet) reduces the amount of force required in the event of a rescue to a minimum. Even inexperienced users understand the principle of this device immediately. No running back of the lifted person, no fiddling with rope clamps or locking bolts. Simply hook in, lift and descend.

Technical data

- approved for 2 persons

- Minimum load 50 kg
- Nominal load 200 kg
- Nominal lifting load 200 kg
- max. abseiling height 160 Meter
- automatic backstop
- direct drive
